Abstract (Basic): JP 7271263 A

A cleaning blade has a plate blade member on an end side of a plate holding material. The plate blade member comprises thermoplastic polyurethane elastomer contg. no plasticiser and hardness being formed with 50-80 (JIS A) by performing thermal processing at 60-100deg.C for 8-16 hrs. Also claimed is a mfg. method of the cleaning blade.

ADVANTAGE - A protecting layer on a surface of a photosensitive drum is not damaged. The cleaning blade is capable of providing good cleaning for a long time.
